EDUCATION

New York University

New York City, USA

Master of Science in Computer Science

September 2025 – May 2027

(Relevant coursework: Machine Learning, Natural Language Processing, Artificial Intelligence, Big data, Design and Analysis of Algorithms)

National Institute of Technology, Tiruchirappalli

India

Master of Computer Applications

August 2019 – May 2022

Banaras Hindu University

India

Bachelor of Science (Hons.) in Computer Science

August 2015 – May 2018

EXPERIENCE

AI Developer Intern

June 2026 – Present

MSITEK

Princeton, New Jersey

- Building an LLM-augmented document-intelligence pipeline (OCR + LLM enrichment for low-confidence fields) feeding a rule-based decision engine that automates invoice matching for a global enterprise client, processing high-volume transactions across multiple geographies.
- Designing the AI guardrails layer for LLM calls — prompt isolation, JSON-schema output validation, RBAC, and audit logging — and contributing to a multilingual agentic email-response system using RAG over enterprise data.

Software Development Engineer

July 2022 – March 2024

Fastenal

Bangalore, India

- Developed and deployed RESTful APIs with 99.9% uptime, enabling real-time data interaction and third-party integrations, boosting customer engagement by 30%.
- Developed and maintained CI/CD pipelines using Jenkins, Docker, and TeamCity, reducing deployment failures by 35% and improving release velocity.
- Implemented TeamCity configuration-as-code using Kotlin DSL, enabling reproducible builds and operational consistency across environments.

Software Development Engineer Intern

January 2022 – May 2022

Fastenal

Bangalore, India

- Implemented backend business logic in Node.js for a distributed supply chain application, leveraging asynchronous processing to reduce latency by 40%.
- Contributed to microservices-based architecture deployed via automated pipelines (TeamCity, Octopus), increasing deployment frequency and system reliability.

PROJECTS

EEG-Based Directional Brainwave Classification for Assistive BCI Systems

February 2026 – April 2026

- Built a BCI classifying EEG into 3 motor-imagery intents with EEGNet + ShallowConvNet ensemble, pre-trained on 153 subjects across 3 datasets and 50-shot per-user fine-tuning, reaching 88.1% accuracy on BCI IV-2a.
- Deployed real-time inference via FastAPI + Kafka with a LangGraph agent loop for quality checks and alerts, plus pgvector retrieval of similar trials to explain each prediction.

AI Workforce Digital Twin for Attrition & Leadership Succession Forecasting

Oct 2025 – Nov 2025

- Built a workforce digital-twin simulator forecasting 5-year mid-level leadership gaps and stress-testing HR what-ifs (retirement, upskilling, DEI), exposing ~50% gaps missed by static plans.
- Benchmarked 7 attrition classifiers via GridSearchCV on IBM HR data (1,470×35), coupling the best model with an IC→Manager→Senior Leader pipeline simulator.

TECHNICAL SKILLS

AI/ML: PyTorch, scikit-learn, NumPy, Pandas, Transformers, RAG, Prompt Engineering, Data Preprocessing

Programming Languages: Python, C/C++, SQL, JavaScript

Systems: Data Structures, Algorithms, Multithreading, OOP, Operating Systems, Memory Management

Cloud & DevOps: Docker, GCP, Firebase, Jenkins, TeamCity, CI/CD Pipelines, Git, Linux

ACHIEVEMENTS

- Represented NYU in the NASA Space Apps Challenge 2025.
- Finalist in Sangam Hackathon in Pragyan 2021 (ISO-certified International Tech Fest) at NIT Trichy
- Secured **All India Rank 76** in NIMCET 2019 (NIT MCA Common Entrance Test).
